EDUCATION

University of Windsor

BComm. Honours, Business Administration & Computer Science (Double Major)
Specialization: Supply Chain & Business Analytics

Sept. 2018 – June 2023

Windsor, ON

EXPERIENCE

Teaching Assistant - Data Structures and Algorithms

University of Windsor

Jan. 2022 – Present

Windsor, ON

- Conducted lab sessions (in-person and online) teaching about 75+ students Data Structure and algorithms concepts.

Teaching Assistant - Computer Networks

University of Windsor

Sept. 2021 – Dec. 2021

Windsor, ON

- Taught students how to implement network applications and sockets in **Python** and **Java**.
- Guided ≈ 25 students/week through advanced network concepts and helped them design networks protocols for the final project.

Coding Teacher (Code Sensei)

Code Ninjas

Mar. 2021 – Sept. 2021

Brampton, ON

- Taught kids ages 5 - 14 how to code in a fun, and engaging way: playing and building video games they love.
- Explained programming concepts using Scratch to code games such as Space Invader and Ninja Run.
- Coached the advanced stage students using our Game Development Platform to teach several languages such as **JavaScript**, **Python**, **Lua**, and **C#**.

Software Engineer Intern

OceanSource Technologies

Aug. 2020 – Dec. 2020

Lasalle, ON

- Designed database structure, so my team could store sensitive medical data to be analyzed with machine learning.
- Implemented database using advanced SQL queries.

PROJECTS

UWindsor Computer Science Wiki | *React.js*, *CSS*, *Docusaurus*

Jan. 2022 – Present

- Opensource project created by Computer Science students to convert the old student guide website primarily written in **Ruby on Rails** into a better Wiki written in **React**.
- Created a student Wi-Fi guide page for the wiki using **React** and **Docusaurus** which provided a new guide for students that helped new students access the university's secure network.

Battle for the Galaxy | *Unity*, *C#*

Nov. 2021 – Dec. 2021

- Created a 3D Multiplayer FPS-Shooter game using **Unity**. Check out our Gameplay.
- Created interactive objects in **Unity**, and programmed **C#** scripts needed for the interactive objects.
- Programming many technically challenging features, including the Capture the Flag System, Weapon Switcher, Player health, the Gun System: Pick and Drop, Aim and Shoot, Variety of Firearms and Bullets, Muzzle Flash effect, FPS Camera Shake (for recoil).

Traffic Data Challenge | *HTML*, *CSS*, *Python*, *JavaScript*

Sept. 25, 2021 – Sept. 26, 2021

- Won 2nd place at BorderHacks 2021 for the Traffic Data Challenge out of 50+ teams.
- Implemented Google Maps API in **JavaScript** to create a site for visualizing Traffic Windsor's OpenData API.

ScheduleSoft | *MySQL*, *Java*, *Junit*

Sept. 2020 – Dec. 2020

- Developed a scheduling application to make managing appointments for clients (patients) easier.
- Designed and implemented a **SQL** database to securely store user log-in info and appointment information.

Network IP Manipulator | *Python*

Sept. 2020 – Dec. 2020

- Used multiple threads so program could discover live network neighbours and report them at the same time.
- Created a tool to find computers on the local network and then removed internet access by overwhelming it with TCP or UDP packets; to expose a vulnerability in the structure of Wi-Fi.

TECHNICAL SKILLS

Languages: Java, Python, C, PHP, HTML, CSS, JavaScript, \LaTeX , C#

Technology: Git, Wireshark, MySQL, PostgreSQL, Unity, Node, Heroku, Tableau

Frameworks: React, Flask, Fastify, Streamlit
